1 History

Document version	IODD version / Firmware version	Date	Changes
1.0.0	V1.0 (2020-09-24) / A.01.00.00	2020-10-08	Version for series devices. Chapter 4: remark added to factory reset system command Chapter 5: 0x2C06 Diagnose: Error bits added 0x2C0A IPF: Remark for AART_D added 0x2C43 Travel time limits: added remark of teach process impact Chapter 6: added Event " <i>Internal error: PCB calibration required</i> " (for IO-Link Class B devices).
0.1.6	V1.0 (2020-09-03) / A.00.02.00	2020-09-10	Preliminary version for preseries devices

2 Abbreviations

Following datatype abbreviations are used in this document:

Abbreviation	IO-Link type	Length
BOOL	BooleanT	1 bit
UI8	UIntegerT	1 byte (8 bit)
SI8	SIntegerT	1 byte (8 bit)
UI16	UIntegerT	2 bytes (16 bit)
UI32	UIntegerT	4 bytes (32 bit)
UI64	UIntegerT	8 bytes (64 bit)
FL32	Float32T	Real32 (Float, 32bit)
STR	StringT	20 characters characters coded with "US-ASCII"

Following abbreviations are used for expressing conditions:

Abbreviation	Meaning
!=	Not equal
==	Equals

Description of used table columns:

Column label	Description
Sub	Sub-index of object
Name	Name of object in IO-Link file
Description	Object description
Access type	IO-Link access rights: RO = read only, RW = read write
Data type	Data type of sub index / object (if only sub index 0 exists)
Data memory	Data storage
Reset group	Sub index will be reset to factory default settings, if corresponding reset group is reset. (Refer to reset group overview below.)

Reset group overview:

Reset Group	Description	For details refer to description of object
A	Factory reset	0x2C16 Factory Reset
B	Partial factory reset (device reset function)	0x2C16 Factory Reset
C	Teach reset	0x2C15 Teach functions: sub0x4 Teach reset command
D	Counter reset	0x2C43 Advanced Diagnostics Limits / Control: sub0x10 Reset command
E	Feedback Field reset	0x2C03 Feedback Field: sub0xD Reset Command

3 Process Data, IO-Link

3.1 Process input data (PDin)

Length: 6 bytes

	↓ Bitoffset Position		↓ Bitoffset Device Status		↓ Bitoffset Valve Mode		↓ Bitoffset Position S4		↓ Bitoffset Position S3		↓ Bitoffset Position S2		↓ Bitoffset Position S1
Bits	47	..	16	15	...	8	7	..	4	3	2	1	0
Sub index	1			2			3			4	5	6	7
Data type	Float32T			UIntegerT			UIntegerT			BooleanT	BooleanT	BooleanT	BooleanT
Name	Position			Device Status			Valve Mode			S4	S3	S2	S1
Length [Bits]	32			8			4			1	1	1	1

Sub-index	Bit offset	Length (bits)	Data type	Description
1	16	32	Float32T	Position in mm (resolution 0.1mm)
2	8	8	UIntegerT	Device status – values: 0: normal 1: diagnose active 2: maintenance required 3: out of specification 4: warning 5: error Bit 4-7 reserved
3	4	4	UIntegerT	Valve Mode – values: 0: Initialization 1: Normal operation 2: Teach function active 3: SafePos active 4: Manual control active 5: Service Mode active 6: Internal SafePos active (all valves off)
4	3	1	BooleanT	Feedback Position 4 (External initiator, S4) True = On False = Off
5	2	1	BooleanT	Feedback position 3 (S3) True = On False = Off
6	1	1	BooleanT	Feedback position 2 (S2) True = On False = Off
7	0	1	BooleanT	Feedback position 1 (S1) True = On False = Off

3.2 Process output data (PDout)

Length: 1 byte

					↓ Bitoffset Locating function	↓ Bitoffset Set point V3	↓ Bitoffset Set point V2	↓ Bitoffset Set point V1
Bits	7	6	5	4	3	2	1	0
Sub-index					1	2	3	4
Data type					BooleanT	BooleanT	BooleanT	BooleanT
Name	Not used				Locate	V3	V2	V1
Length[Bits]	4				1	1	1	1

Sub-index	Bit offset	Length (bits)	Data type	Description
1	3	1	BooleanT	Locating function (fast flashing LEDs) True = Activated False = Deactivated
2	2	1	BooleanT	Set point valve 3 (V3): True = Open False = Closed
3	1	1	BooleanT	Set point valve 2 (V2): True = Open False = Closed If feature AART_D for double acting valves is activated, V2 set point will not be used. V2 is actuated by set point for valve V1.
4	0	1	BooleanT	Set point valve 1 (V1): True = Open False = Closed If feature AART_D for double acting valves is activated, V2 will be actuated automatically by set point for valve V1.

4 Supported IO-Link system commands

command	Description
128	Device reset (restart)
130	Restore factory settings **)
160	Start automatic teach function 1
161	Start automatic teach function 2
162	Start automatic teach function 3 *)
163	Start automatic teach function 4 *)
164	Start automatic teach function 5 *)
165	Start automatic teach function 6 *)
166	Start manual teach function position S1
167	Start manual teach function position S2
168	Start manual teach function position S3
169	Feedback Field Mode 1
170	Feedback Field Mode 2
171	Feedback Field Mode 3
172	Feedback Field Mode 4
173	Feedback Field Mode 5 (Reserved for future use)
174	Feedback Field Mode 6 (Reserved for future use)

*) If feature AART_D for double acting valves enabled (see object 0x2C05sub6), automatic teach functions 3-6 are without function.

***) Device restarts after factory reset if triggered by system command.
IO-Link connection has to be established again by the IO-Link master.

5 Non-cyclic parameters (On-Request Data (ISDU))

Following datatype abbreviations are used in this document:

Abbreviation	IO-Link type	Length
BOOL	BooleanT	1 bit
UI8	UIntegerT	1 byte (8 bit)
SI8	SIntegerT	1 byte (8 bit)
UI16	UIntegerT	2 bytes (16 bit)
UI32	UIntegerT	4 bytes (32 bit)
UI64	UIntegerT	8 bytes (64 bit)
FL32	Float32T	Real32 (Float, 32bit)
STR	StringT	20 characters characters coded with "US-ASCII"

Following abbreviations are used for expressing conditions:

Abbreviation	Meaning
!=	Not equal
==	Equals

Description of used table columns:

Column label	Description
Sub	Sub-index of object
Name	Name of object in IODD file
Description	Object description
Access type	IO-Link access rights: RO = read only, RW = read write
Data type	Data type of sub index / object (if only sub index 0 exists)
Data memory	Data storage
Reset group	Sub index will be reset to factory default settings, if corresponding reset group is reset. (Refer to reset group overview below.)

Reset group overview:

Reset Group	Description	For details refer to chapter
A	Factory reset	5.24 0x2C16 Factory Reset
B	Partial factory reset (device reset function)	5.24 0x2C16 Factory Reset
C	Teach reset	5.23 0x2C15 Teach functions: sub0x4 Teach reset command
D	Counter reset	5.28 0x2C43 Advanced Diagnostics Limits / Control: sub0x10 Diagnosis command
E	Feedback Field reset	5.12 0x2C03 Feedback Fields: sub0xD Reset Command

5.1 Supported common IO-Link data objects

Index (dec)	Object name	Access	Length	Data type	Remark *)
0x0000 (0)	Direct Parameter Page 1	R		RecordT	Redirected to the page communication channel, see 10.7.5
0x0001 (1)	Direct Parameter Page 2	R/W		RecordT	Redirected to the page communication channel, see 10.7.5

0x8	Travel Time Limit V2 Off	Refer to Travel Time Limit V1 Off, but with solenoid valve V2 *)	RW	UI16	x	A
0x9	Travel Time Limit V3 On	Refer to Travel Time Limit V1 On, but with solenoid valve V3	RW	UI16	x	A
0xA	Travel Time Limit V3 Off	Refer to Travel Time Limit V1 Off, but with solenoid valve V3	RW	UI16	x	A
0xB	Time tolerance	Tolerance for configurable Travel Time Limits [%]: Specifies the tolerance for the parameters "Travel Time Limit V1/V2/V3 On/Off" (0x2C43sub5 – subA), from which point an active warning is generated.	RW	UI8	x	A

sub	name	description	access type	data type	data memory	reset group
0xC	Switching timeout detection	<p>Activate or deactivate switching time timeout detection: If activated, switching time timeouts will be detected whenever the end position is not reached within a certain time (refer to sub index 0xD – 0xF) and an error is output. Requires at least two detectable end positions. Not active during automatic teach function. Switching timeouts are measured, if only 1 solenoid valve is switched on / off and max. 1 solenoid valve is active. **)</p> <p>Bit – coded: Bit0 = Switching timeout detection V1 Bit1 = Switching timeout detection V2 Bit2 = Switching timeout detection V3 Values: 0: Deactivated, 1: Activated</p>	RW	UI8	x	A
0xD	Switching timeout V1	Select maximum time by which the end position should be reached [ms]	RW	UI16	x	A
0xE	Switching timeout V2	Select maximum time by which the end position should be reached [ms] *)	RW	UI16	x	A
0xF	Switching timeout V3	Select maximum time by which the end position should be reached [ms]	RW	UI16	x	A
0x10	Diagnosis command	<p>Reset counters / Import vales. Selection is bit-coded. All bits = 0: command finished For details refer to table ***) below.</p>	RW	UI32		

*) Inactive in case of enabled feature AART_D for double acting valves (see object 0x2C05sub6).

**) in case of enabled feature AART_D for double acting valves (see object 0x2C05sub6):

Pilot valve V2 is actuated almost together with V1. Switching timeout detection ignores pilot valve V2 actuation.
Switching timeout detection V2 is not working. Use switching timeout detection V1 to check pilot valve V1 and V2.

***) Diagnosis command - details

Bit	Bit = 1	Affected objects
0	Reset operation hour counter	0x2C01sub2
1	Reset switching cycles V1	0x2C01sub4
2	Reset switching cycles V2	0x2C01sub6
3	Reset switching cycles V3	0x2C01sub8
4	Reset travel accumulator	0x2C40sub2
5	Reset travel accumulator V1	0x2C40sub4
6	Reset travel accumulator V2	0x2C40sub6
7	Reset travel accumulator V3	0x2C40sub8
8	Reset number of Travel timeouts V1 On	0x2C41sub1
9	Reset number of Travel timeouts V1 Off	0x2C41sub2
10	Reset number of Travel timeouts V2 On	0x2C41sub3
11	Reset number of Travel timeouts V2 Off	0x2C41sub4
12	Reset number of Travel timeouts V3 On	0x2C41sub5
13	Reset number of Travel timeouts V3 Off	0x2C41sub6
14	Reset number of switching time timeouts V1	0x2C41sub7
15	Reset number of switching time timeouts V2	0x2C41sub8
16	Reset number of switching time timeouts V3	0x2C41sub9
17	Copy measured travel times V1 On / Off from 0x2C42sub1, 0x2C42sub2	0x2C43sub5, 0x2C43sub6
18	Copy measured travel times V2 On / Off from 0x2C42sub3, 0x2C42sub4	0x2C43sub7, 0x2C43sub8
19	Copy measured travel times V3 On / Off from 0x2C42sub5, 0x2C42sub6	0x2C43sub9, 0x2C43subA

6 Events

Event Code	Event Type	Description	Action
0x1000 (4096)	ERROR	General malfunction - unknown error	Restart device If fault persists, contact Pentair Südmo GmbH Service.
0x4000 (16384)	ERROR	Temperature error overload - device temperature for operation too high	Modify ambient temperature. If fault persists, contact Pentair Südmo GmbH Service.
0x4210 (16912)	WARNING	Temperature warning upper threshold exceeded - ambient temperature too high or excessive friction in actuator	Reduce ambient temperature. If fault persists, contact Pentair Südmo GmbH Service.
0x4220 (16928)	WARNING	Temperature warning lower threshold exceeded - ambient temperature too low.	Increase ambient temperature
0x5100 (20736)	ERROR	General power supply error - supply voltage for operation of device too low	Check supply voltage If fault persists, contact Pentair Südmo GmbH Service.
0x5110 (20752)	WARNING	Voltage warning upper threshold exceeded - supply voltage too high	Check supply voltage
0x5111 (20753)	WARNING	Voltage warning lower threshold exceeded - supply voltage too low	Check supply voltage
0x6000 (24576)	ERROR	Internal software error	Restart device If fault persists, contact Pentair Südmo GmbH Service.
0x1801 (6145)	ERROR	General power supply error - supply voltage for operation of device too high	Check supply voltage If fault persists, contact Pentair Südmo GmbH Service.
0x1802 (6146)	ERROR	Temperature error lower threshold exceeded - ambient temperature too low	Increase ambient temperature
0x1804 (6148)	ERROR	Internal error: WMS signal error (WMS: position measuring system)	Check the target for correct mounting and condition If fault persists, contact Pentair Südmo GmbH Service
0x1809 (6153)	ERROR	Nonvolatile storage memory isn't usable	Restart device If fault persists, contact Pentair Südmo GmbH Service.
0x180A (6154)	WARNING	Teach function required	Starting teach function
0x180B (6155)	ERROR	Teach function error	Check pilot pressure Check pilot valves Restart teach function If fault persists, contact Pentair Südmo GmbH Service.
0x180C (6156)	WARNING	Exceed travel accumulator limit	Where appropriate, check wear-and-tear parts in pneumatic actuator and valve
0x180D (6157)	WARNING	Exceed valve cycle limit	Where appropriate, check wear-and-tear parts in pneumatic actuator and valve

Event Code	Event Type	Description	Action
0x180E (6158)	WARNING	Exceed operation time limit	Perform maintenance as appropriate
0x180F (6159)	WARNING	At least one travel time threshold (specified travel time and tolerance) exceeded	1. Check compressed air supply 2. Check actuator and valve for friction
0x1811 (6161)	ERROR	Switching timeout - end position not reached	Check pilot pressure Check pilot valve Restart teach function If fault persists, contact Pentair Súdmo GmbH Service
0x1813 (6163)	WARNING	Automatic teach function active	Wait until automatic teach function has been completed
0x1814 (6164)	ERROR	IO-Link error	Check IO-Link connection
0x1815 (6165)	WARNING	Manual valve control active (Valves Mode = MAN)	To disable manual valve control, refer to description of object 0x2C02.
0x1816 (6166)	WARNING	Service Mode active	To disable Service Mode apply the magnetic service tool or restart device.
0x1817 (6167)	ERROR	PCB not supported by current firmware	Restart device. If fault persists, contact Pentair Súdmo GmbH Service.
0x1818 (6168)	WARNING	User triggered maintenance signal Device marked e.g. for maintenance purposes.	To disable signal refer to description of object 0x210A or restart device.
0x1819 (6169)	ERROR	Class B devices only: Overvoltage actuator supply detected	Check actuator supply voltage If fault persists, contact Pentair Súdmo GmbH Service.
0x181A (6170)	ERROR	Class B devices only: Undervoltage actuator supply detected	
0x181B (6171)	ERROR	Class B devices only: Out of specification actuator supply voltage detected	
0x181C (6172)	ERROR	Error power supply measurement	Check supply voltage. Restart device. If fault persists, contact Pentair Súdmo GmbH Service.
0x181D (6173)	ERROR	Incorrect valve position	Check process valve air supply assignment Check settings of 0x2C11 Top LED mode If fault persists, contact Pentair Súdmo GmbH Service.
0x181E (6174)	ERROR	Class B devices only: PCB calibration required.	Contact Pentair Súdmo GmbH Service.
